

MATTHEW GOEMBEL

SOFTWARE ENGINEER · FOUNDER · TRADER

Palm Bay, FL | 919-740-0631 | mgoembel1@gmail.com | matthewgoembel.github.io/mattyg.com/

SUMMARY

Software Engineer and founder with full-stack experience across web, mobile, and cloud. Built and shipped products solo, from product to launch. Over three years of active market experience and six-figure results as a funded prop trader. Proven results in growing brands through content, social, and digital strategy. I bring an unparalleled engineering and entrepreneurial drive, with trader-level discipline and work ethic to everything I do.

EXPERIENCE

Software Engineer — Thrive Communities

April 2026 - Present

Remote · learnatthrive.com

- Built the org's in-house communications platform, replacing a third-party SaaS vendor as the primary comms tool for staff across multi-state campuses.
- Delivered 8+ features and full-stack infrastructure projects in 3 months
- Containerized local development with Docker and Supabase CLI, standardizing setup across the team.

Digital Operations Lead — Carolina Cabinet Specialist

June 2024 - Present

Cary, NC · carolinacabinetspecialist.com

- Run the full digital presence for the company - content strategy, social media growth, website management, SEO, GEO, and Meta Ads.
- Generated over half a million views across Facebook, Instagram, and YouTube.
- Increased website traffic acquisition by over 120% in the last 12 months.

Co-Founder — GM Trading

April 2026 - Present

Remote · mattygtrading.com

- Co-founded a private Discord-based trading community and grew to nearly 50 members within the first month of launch.
- Led student traders to multiple funded evaluations passed and 4-figure payout milestones; the community generated 5+ figures in collective profits in under a month.
- Live-stream daily trading sessions and develop original trading course content for community members.

PROJECTS

Hypewave AI — AI Trading Platform

May 2025 - Present

Solo founder & developer · hypewaveai.com

- Designed, built, and shipped a full-stack AI trading platform end-to-end.
- Engineered automated, real-time market signals using my trading strategy and measured 58% win rate and personally generated 4-figure profits trading the model live.
- Built a FastAPI / MongoDB backend with Firebase OAuth, integrated Telegram-based news scraping, and powered chart-based AI chat using OpenAI and Anthropic APIs.

Cool Cyber Games — Cybersecurity Learning Platform

Jan 2025 - Dec 2025

Full-stack developer · coolcybergames.com

- Built a multi-game cybersecurity learning platform with four original games in 2D & 3D.
- Presented at the Florida Tech Senior Design Showcase and Co-authored a published IEEE paper.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (March 2024)
- Google Cloud Certified Cloud Digital Leader (June 2025)
